	Gallery		Speaker tracking
	Zoom out		Manual
	Zoom in		

*Use the remote control within 3m to 6m from the sensor on the product within 60° angle from the center of the remote sensor.

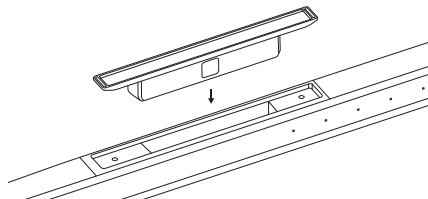

Wi-Fi Module Installation

Please install the Wi-Fi module before power on product.

1. Use a Phillips screwdriver to remove the M3 screws and lift off the metal plate on top of the display.

2. Insert the Wi-Fi Module into the USB port on the top of the panel until firmly seated.

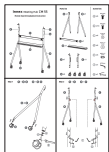

Wi-Fi Module does not support hot plugging. Therefore, you must insert or remove the Wi-Fi Module when the display is powered off. Otherwise, the panel display or Wi-Fi Module may be damaged.

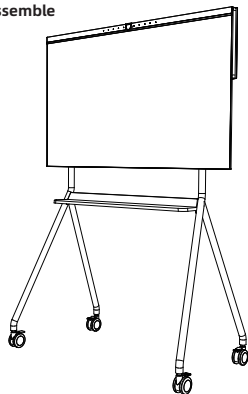

CM 55 Installation

Please follow the assembly instruction in the stand package to assemble the mobile stand.

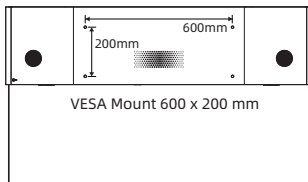

Assembly Instruction

Screw kits

*Wall mount specification

The dimensions of the four bracket mounting holes on the back panel are 600 x 200mm

Peel off the hole cover and use metric M8 screws with a length of 10 mm to 15 mm (0.40 to 0.59 in) to secure the touchscreen to the mounting system.

Initial settings

When you start CM 55 for the first time after purchase, you'll need to go through some initial setup steps. Simply follow the on-screen instructions to complete them.

1. Language setting

Please select the system language.

2. Keyboard

Please select the on-screen keyboard.

3. Device name and hotspot setting

Please set the device name, hotspot name and hotspot password.

*Please re-pair the Connect Pro Button with the CM 55 if you've changed any hotspot settings.

4. Time zone

Please manually set the date and time, or sync time with selected time zone.

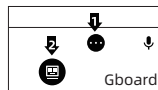

5. Network setting

Please select and connect to a network. Please note that the screen share app requires accessing the internet to be activated. The process may require 1 to 2 minute, depending on network status.

6. User agreement and privacy policy

Please read and agree to the user agreement and privacy policy.

Tips: Enable floating mode in Gboard

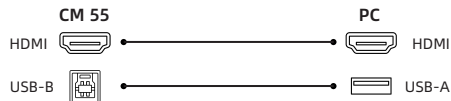

- (1) Access the Gboard keyboard in any text input field, and tap "more" icon.
- (2) Tap the "Floating" option from the menu. The keyboard will become movable.

Now, you can place the keyboard anywhere on the screen, allowing for better visibility and interaction with other apps.

Sources and connections

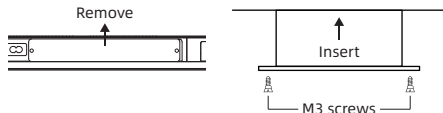

HDMI 1 & HDMI 2

Connect your device by using a HDMI cable and USB B-A cable.

OPS

Remove the metal cover from the OPS slot, insert the OPS into the slot on the back of the display, and secure it with screws.

Screen share

With the built-in screen share app, users can screen share natively via Airplay, Miracast, and Chromecast. In addition to screen sharing, to access the CM 55 camera, microphone and touch back wirelessly, users must use the Connect Pro Button.

Note:

- Miracast: Requires the CM 55's hotspot to be disabled.
- Chromecast: Only 1 Chromecast device can occupy the screen at any time. (Multiple screen share layout not supported.)

Innex Connect Pro Button

Please pair the button with display before use. Plug the Connect Pro Button into the USB-C OTG port on the back of display, the pairing will start automatically. Follow on-screen instructions to complete setup.

Plug the Connect Pro Button into a full-featured USB-C laptop port. Once the status light starts flashing slowly in white, press the button to start or pause screen sharing.

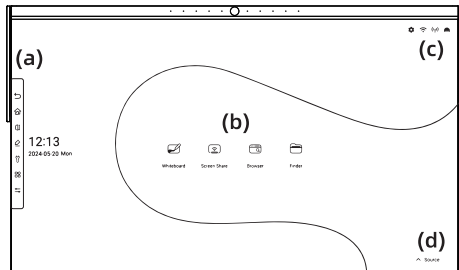

To access display camera, microphone and speaker wirelessly, in your video conference software, select "Connect Pro" as your camera, microphone and speaker.
