One Hub. Any Display.

Upgrade any screen into a powerful meeting hub with integrated camera access, touchback control, and universal wireless sharing.

Boost ROI
High-impact, cost-effective upgrades for your existing displays and peripherals.

Zero-Friction Setup
Fast, scalable deployment with no complex IT onboarding.

Clean Aesthetics
Compact design and minimal wiring eliminate cable clutter.

Data Privacy
Keeps sensitive information secure by storing data locally on the presenter's PC.

Elevate Your Existing Displays

Turn your monitors or TVs into a wireless conferencing meeting solution simply by connecting the Innex Connect Pro+ via HDMI and USB.

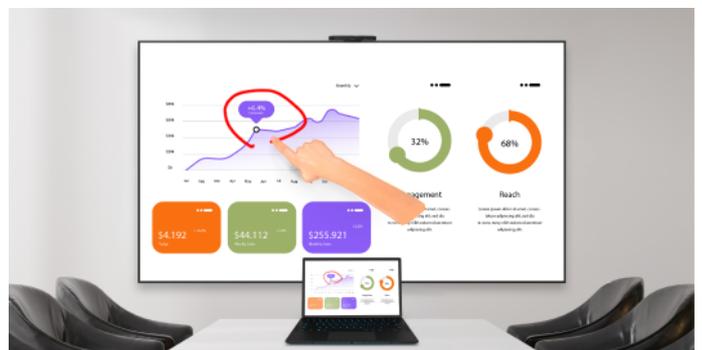

Instant 4K Wireless Casting

Effortlessly share your screen in stunning 4K clarity, including video, content, and presentations, all with lag-free connections.

1080P Wireless Camera Streaming

Join meetings from your own laptop and wirelessly access the front camera via the Connect Pro Software.

Dynamic Multi-Sharing

Connect an unlimited number of devices at once. View up to 9 devices simultaneously in split screen from laptops, tablets, and smartphones.

Intuitive Touchback Control

Control your device from the display. Annotations and on-screen operations sync back to your laptop in real-time.

Universal Wireless Casting

Chromecast

AirPlay

Miracast

Connect Pro Software

Connect Pro Button
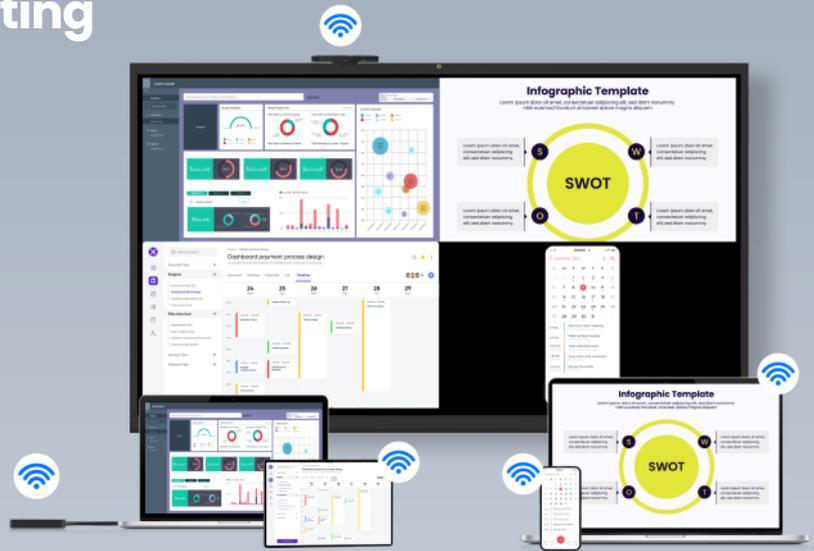

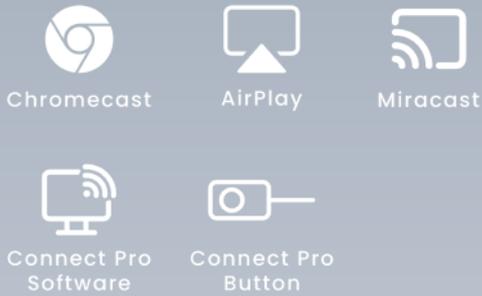

Innex Connect Pro Software: BYOM Ready

Connect Pro Software integrates wireless casting, audio, touch, and BYOM. Its Mirror-back feature allows users to view and control the main display from their own laptops, ensuring a synchronized experience for large-scale deployments.
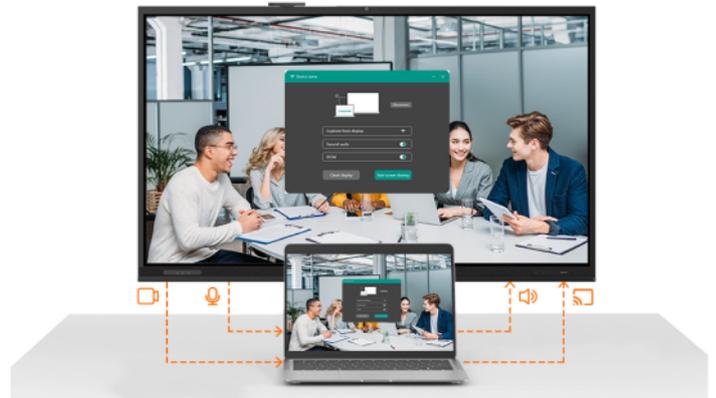

Optional Accessory

Innex Connect Pro Button: Plug-and-Play

Enables a truly plug-and-play setup, allowing you to share your screen with just one click. The built-in power pass-through allows you to cast and charge your laptop simultaneously—just connect your power adapter to the button.

Click to Connect

Power Pass-through
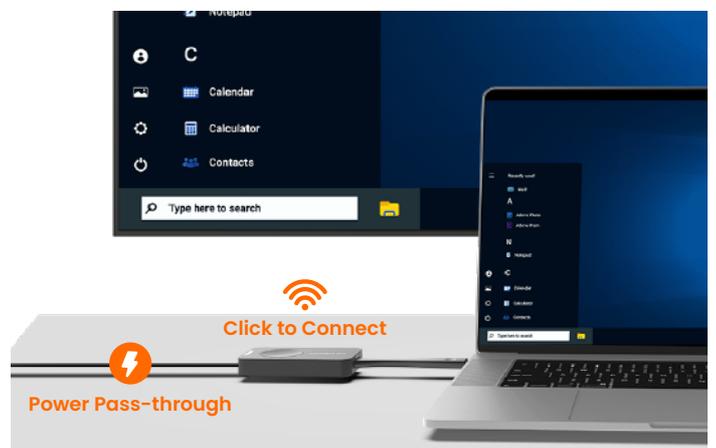

The Ultimate Wireless Conferencing Solution

The Innex Connect Pro+ transforms any monitor or touchscreen into a wireless conferencing hub using simple HDMI and USB connections. Enjoy seamless device sharing, camera streaming, touchback control, and peripheral access.
